Teaching Evaluation Report - Lecturer - BIOL215, BIOL984, CHEM325 Applied Bioinformatics, Bioinformatics: Genome, Genes and Biomolecules, Introductory Genetics, Spring 2025, Doctor Nikolas Johnston

Project Title: **Spring/Trimester 3 2025 - Subject and Lecturer Evaluations**

Subject Enrolments: **231**
Responses Received: **43**
Response Rate: **18.61 %**

Report Comments

This report is designed primarily for Teachers and provides:

- TEBS response rate and basic respondent demographics
- Overall evaluation ratings and ratings for each question
- Free-text comments – providing valuable information on aspects important to students and suggestions for improvements.

If you have any questions about this report, contact uow-evaluations@uow.edu.au.

Free Text Comments

Please note that all student comments have undergone AI-driven analysis to identify any inappropriate feedback received. While we hope that the majority of feedback is constructive and valuable, there is still a possibility of inappropriate comments being present. Should you encounter any inappropriate feedback, please report it to uow-evaluations@uow.edu.au. It is important for students to understand that any inappropriate feedback will not be tolerated. In the first instance such comments will be redacted and the student issued a warning. Repeated or serious instances will be directed to the Integrity Division for investigation under the Student Conduct Rules.

Interpreting the data

- Teacher Evaluation Reports are generated only when six or more students complete the survey. However, the results for subjects with fewer than six respondents are included in the aggregate UOW, Faculty and School reports.
- Response rates of less than 10% should be interpreted with caution.
- A numeric value is assigned to each response. These are used to calculate the average (mean) for each question. Values assigned are:
    - Strongly Agree (6)
    - Agree (5)
    - Mildly Agree (4)
    - Mildly Disagree (3)
    - Disagree (2)
    - Strongly Disagree (1)
    - Unable to Judge (not counted)
- **An overall Teacher Evaluation mean is calculated on the 10 core questions only** - Any additional questions included in the survey are not counted towards the mean.
- Mean scores can hide extremes in responses, as such, you are encouraged to also utilise response distribution and percentage agreeable metrics.

About the TEBS Survey

The TEBS Survey has been designed as a tool to assist teachers to evaluate and reflect on their teaching within a subject.in order to assess their impact on teaching and learning.
These reports are also used as formal teaching evidence in UOW Academic Probation and Promotion applications, included in OCTAL documentation and supporting documentation during annual career development meetings.

See the Evaluation of Learning and Teaching website for further information.

Creation Date: **Friday, December 5, 2025**

11. What were the best aspects of the Lecturer's teaching and what aspects of teaching would you suggest this Lecturer could improve?

Comment
This isn't a note on the lecturer but theres no spot for me to write my grievances on the course as a whole so i'm putting it here. This course I found was lacking in most aspects. I praise the lecturers for there attempts to keep things functional but overall I found it difficult to work with. This isn't even specific to this course but rather this whole semester, the labs have felt underwhelming and minimised in a way thats detrimental to all the students. We had 4 students to an experiment which was good in the sense of us being able to work in our groups for the assignment, but terrible for the actual labs as there wasn't nearly enough work to go around. Half the labs were spent on a computer or waiting around, and the actual work that needed doing in either scenario could be completed by 1 person. I found myself often times just waiting in the labs whilst a single person from the group did the minimal amount of work for the rest of us, and even with trying to share the work load so everyone got a chance to do something, we still barely did anything. In the future, I would suggest lowering the lab group sizes down to 2 per experiment, which I understand may be difficult seeing as a large portion of the labs required using equipment which is in short supply, but I feel the overall gain for each student would be much higher.
Jay is very awesome. I can't seem to remember who Nik is but I'm sure he's great too.
Loved how thorough he went through his topic and made it easy to understand. Very interactive which kept me focus
the lectures were good and undertstandable
Greater preparation for a practical, which is very critical to the final written assessment, would better improve the student experience and ensure that students actually understand how to analyse the data, rather than a rushed fix to a very foreseeable problem.
–
–
I really liked how down–to–earth Nik was, during practicals he would frequently walk around and ask everyone how we were going and if we had any questions which was really good when we were stuck.
Nick was always very friendly, nice, and approachable. He answered our questions with a great sense of humour, which made the classroom environment much more engaging.
Great work!

11. What were the best aspects of the Lecturer's teaching and what aspects of teaching would you suggest this Lecturer could improve?

Comment
good
Explains everything clearly and makes the lectures interesting—no suggestion needed to improve his lectures. I enjoyed his lectures and the practical sessions I attended.

11. What were the best aspects of the Lecturer's teaching and what aspects of teaching would you suggest this Lecturer could improve?

Comment
Good delivery and easy to understand
This lecturer was very enthusiastic in his presentation and left little to be improved upon.
very engaging, knowledgeable and clearly passionate lecturer. always enjoy lectures with Nik.
nice explanations and really good help during pracs
Well knowledgeable

Reliability Assessment Score (RAS)

The RAS gives you an indication of the reliability of the data reflecting accurately the views of the student cohort. Results will be classified as insufficient, sufficient or good. Where scores are considered insufficient we encourage you to review the statistical information with caution and focus instead on the free text comments.

With 43 responses from a survey population of 231, the data presented in this report is considered to be **Sufficient**
Number of responses needed to be considered sufficient: 18
Number of responses needed to be considered good: 58
